PREFACE

District Collector, Latur, issued notification on 26-11-2021 declaring Mid-Season Adversity due to excess rainfall causing crop loss due to infestation of pest and disease in Red Gram(Toor) crop in all notified insurance units of the district. The Revamped PMFBY Operational Guidelines specify the methodology to be adopted for on-account payment of Claims under Mid-Season Adversity cover (Article 21.4.2.4 as under)

21.4.2.4 The quantum of likely losses and the amount of 'on-account' payment shall be decided based on the joint survey by representatives of IC, District Administration/State Government Nodal Department and Farmers. In case of dispute/disagreement between the stakeholders regarding the quantum/extent of loss reported by the Joint Loss Assessment committee, the claim calculation will be done using technology derived solutions involving weather/remote-sensing indices along with loss assessment surveys with weightage of 70% : 30% respectively for assessment and evaluation of the final extent of loss. Acceptance of the technology based assessment of the extent of loss will be binding on all stakeholders.

This report is submitted to facilitate the claim calculation on the basis of technology derived solutions involving weather/remote-sensing indices.
